The Comprehensive and Grand Encyclopedia of the Numerical Miracles of the Holy Qur'an: A Deep and Documented Investigative Study of the Mathematical, Astronomical, Geographical, and Rhetorical Balance. Introduction and Scientific Foundation of Qur'anic Statistics.

Praise be to Allah, Who revealed the Book to His servant, making it straight and without crookedness, to warn of a severe punishment from Him and to give good tidings to the believers who do righteous deeds that they will have a good reward. And peace and blessings be upon the Prophet of guidance and mercy, sent with clear signs and decisive proofs, and upon his pure family and companions, the guiding lights. To proceed: The Holy Qur'an is the eternal and ever-renewing miracle of Islam throughout the ages. While the early generations were captivated by the eloquent and rhetorical brilliance of the Quran, our current era, the age of mathematical sciences and digital computing, has revealed a unique and miraculous aspect of God's Book: its numerical and linguistic miracles. This comprehensive work presents researchers and readers with a thorough and well-documented collection of all the precise numerical phenomena in the Quranic text, free from artificiality

The strict methodology for counting letters and words in Ottoman script

The Quran

Chapter One: A Dictionary of Perfect Verbal Analogy (Balance of Opposites and Contrasting Words)

Perfect verbal analogy means that the opposite or antithetical word appears

The other word has the exact same number of occurrences in all the chapters and verses of the Quran.

The generous one. This amazing balance encompasses the dualities of existence, the soul.

Humanity and the Hereafter: Reward and Punishment

The world is mentioned **115** times, **and**

the hereafter is mentioned **115** times (an absolute correlation between the abode of action

(and trial) and the abode of eternity and reward).

Angels are mentioned **88** times . **Demons**

are mentioned **88** times. (A delicate balance between the unseen world, representing good

and evil.)

Life is mentioned **145** times . **Death** is

mentioned **145** times. (A complete and comprehensive correspondence between the

derivatives (nominal and verbal) indicating existence and non-existence)

Good deeds were mentioned **167** times . **Bad**

deeds were mentioned **167** times. (A perfect balance between deeds that earn reward and

deeds that earn punishment)

Machine Translated by Google

Light : 24 times ; **Darknesses : 24** **Darkness/**

times (a balance highlighting the complete and existential contrast)

(Between guidance and misguidance)

Desire is mentioned **8** times . **Awe** is

mentioned **8** times (balancing feelings of fear and hope in the human soul during worship).

from Satan is mentioned **11** times , and **Seeking refuge**

seeking refuge **in God** is mentioned **11** times (equal to the number of times the source of temptation is mentioned).

(with the means of fortification and the protective shield against it)

The words "al-jahr" and "al-'anniyah"

appear **16** times . (A striking similarity in synonyms: "announcement" and "demonstration,"

confirming the computational accuracy of the text.)

The word "hardship" is mentioned **102**

times , and **the word "patience"** is mentioned **102** times (a definitive numerical indication that for every

hardship there is a corresponding and equivalent act of patience in terms of reward and endurance).

Love is mentioned **83** times . **Obedience**

is mentioned **83** times. (Statistical evidence that true love for God is accompanied and corresponds to

complete obedience.)

A miraculous observation regarding multiplication

Machine Translated by Google

The penalty was mentioned: **117** times • **Forgiveness** is mentioned **234** times.

(Forgiveness is mentioned twice as much as the reward, demonstrating the overwhelming power of mercy.)

the wicked are mentioned **3** times . **The righteous** are mentioned **6** times ;

The mention of the righteous as being weaker than the wicked is an affirmation of their high status.

Righteousness and its people

Chapter Two: Pure Numerical Symmetry in the Names of the Prophets. One of the most subtle

and precise wonders of Qur'anic statistics is numerical symmetry.

Among the names of the prophets who share historical ties or similarities

A specific cosmic order explicitly stated in the verses of the Quran

The miraculous parallel between Jesus and Adam, peace be upon them both: Surah

Al Imran established a clear principle of parallelism in the creation of each

"that From Adam and Jesus, peace be upon them, as stated in the Almighty's words:

Be *He* *created him from dust. He said, "From dust He created him."* *Adam and Jesus are like God in*

What is truly astonishing and remarkable is this graphic and doctrinal similarity.

It was accompanied by crucial digital accuracy throughout the entire Quran.

The name of the Prophet **Adam** is mentioned **25** times throughout the entire Holy Quran .

.completely

The name of the Prophet **Jesus** is mentioned repeatedly in the Holy Quran .

All of it exactly **25** times

Machine Translated by Google

This absolute equality in the number of occurrences definitively proves the precision of the Quranic mathematical structure, ensuring that the numerical count aligns with the figurative analogy found in the verse. **Chapter Three: Astronomical, Temporal, and Geographical Constants of Planet Earth**

The numerical miracle transcends mere verbal correspondence, aligning with the most minute details of astronomy, timekeeping, and contemporary geography of planet Earth, thus proving that the author of this text is the creator of this universe.

Astronomical Calculation and Calendar 1. The with mention of temporal terms in the Quran is in absolute agreement with: The true astronomical cycle of the Earth and Moon around the Sun: **The word "day" (in its singular and indefinite forms):** It is repeated exactly **365** times in the entire Holy Quran , which corresponds to the number of days in a simple solar year . **The word "days" (in its plural forms):** It is repeated exactly **30** times in the Holy Quran , which corresponds to the number of days in a standard month. **The word "month":**

- It is repeated exactly **12** times in the Holy Quran , which corresponds to the number of months in the astronomical and legal year.

The Miracle of the Distribution of Land and Water (Land and Sea) 2. One of the most astonishing modern mathematical discoveries is calculating the distribution ratio of the terms for continents (land) and oceans (water) on the planet through the eloquent Qur'anic language. The word **"sea"** (in its forms denoting water) is repeated **32** times in the Qur'an. The word " land **"** (and terms denoting land) is repeated **13** times in the Qur'an . **The Qur'anic Geographical Equation:** Total number of terms denoting the nature of the Earth's surface = 32 + 13 = **45.** Percentage of sea (water) = (32 ÷ 45) × 100 =

Percentage of land (plain) = (13 ÷ 45) × 100 • **28.89 = %**

These percentages, extracted with extreme precision from the number of words fourteen centuries ago, are the same precise geographical and physical ratios recently discovered by satellites and international space agencies for the distribution of water and land on planet Earth.

Chapter Four: The Structure of Disconnected Letters, the Miraculous Significance of the Number 19, and the Seven Oft-Repeated Verses

1. The Disconnected Letters (Opening Verses of the Surahs):

Twenty-nine chapters (surahs) in the Quran begin with disjointed letters. (When counting...)
These letters in the surahs that begin with them reveal striking parallels.
For example, the letter "Q" in Surah (Q) is repeated **57** times, and the letter
The letter "Qaf" in Surah Ash-Shura (which begins with 'Ayn-Sin-Qaf) is repeated **57** times .
Also, the sum of the two letters in the two surahs equals **114,** which is the number
Total number of chapters in the Holy Quran!

2. The miraculous nature of the number 19 in textual structure

The text explicitly mentions the number nineteen in Surah
Statistical studies have proven *"Nine" on it* The
expanded version states that the Basmala, "In the name of God, the Most Gracious, the Most Merciful," consists of
It consists of **19** letters, and the words of the Basmala are repeated in multiples of 19 throughout
the entire Holy Quran.

The word " **name"** is repeated **19** times (which is equivalent to: 19 x 1) .

The word **of God** is repeated **2698** times (which is equivalent to: 19 x 142) .

The word **"Rahman"** (the Most Merciful) is repeated **57** times (which is equivalent to: 19 x 3) .

The word " **the Merciful"** is repeated **114** times (which is equivalent to: 19 x 6) .

Conclusion and result of faith

In conclusion to this comprehensive encyclopedia, it becomes clear to the discerning researcher that this miraculous mathematical correspondence, which links the structures of words to their meanings and connects terms to the realities of the universe, its geography, and its astronomy, could in no way be the product of chance or human invention. It is a divinely ordained and precise formulation, established with the scales of truth and justice, to stand as a testament to the veracity of the message and the prophethood of the Chosen One, peace and blessings be
